We LOVE Balloons

But we also love our world!
We know you care about the environment and so do we!

EN

Latex is a natural product derived from the sap of a tree (rubber tree plantations consumes CO₂, meaning it reduces global warming).

Latex is a suitable substrate for the proliferation of bacteria and fungi, which degrade the material, this demonstrates its high degree of biodegradability and this also means balloonia balloons are biodegradable.

But wait! We've got more:

- Our pigments are organic
- We use solar energy for our production
- Ecological awareness: "Bin it, don't let go!"

On the other hand, our merchandising products are made with 100% recyclable materials.

This makes Balloonia a 100% committed brand.

ES

El látex es un producto natural derivado de la savia de un árbol (las plantaciones de árboles de caucho consumen CO₂, lo que significa que reducen el calentamiento global).

El látex es un sustrato adecuado para la proliferación de bacterias y hongos, que degradan el material, esto demuestra su alto grado de biodegradabilidad y esto también hace que los globos Balloonia sean biodegradables.

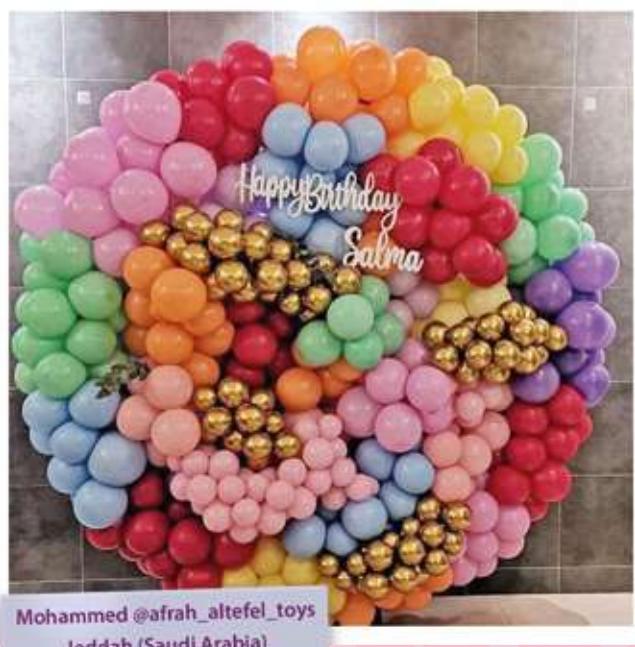

¡Pero espera! Tenemos más:

- Nuestros pigmentos son orgánicos
- Utilizamos energía solar para nuestra producción
- Conciencia ecológica: "¡Tíralo a la basura!"

Por otro lado, nuestros productos de merchandising están elaborados con materiales 100% reciclables.

Esto convierte a Balloonia en una marca 100% comprometida.
