62-63 VISION & ABOUT US

COMPETITIVE ADVANTAGE

The LeverGym® Advantage

Lever arms drive the exercises. Weight plates are loaded directly onto the lever arms which simply replace the barbell thus providing the natural feel and resistance of free weight with the safety and control of a machine.

Modularization

Our Workbench series allows the user to expand their home gym with a wide array of accessories to meet their custom needs.

Heavy Duty

Commercially-rated equipment for home use with weight capacity of up to 1000 lbs. on select machines.

Safety

The smooth and safe operation of our signature leverage machines allow the user to lift the maximum weight and train to failure, all with perfect safety and without the need for a spotter. The ultimate free-weight experience!

CORE VALUES

"We strive to provide the best plate loaded leverage strength training equipment for both home and light commercial use in the industry. Powertec® is used by professional athletes and strength enthusiasts alike who demand gym quality equipment at home. As the leader in leverage strength equipment, we focus on designing products that deliver safety, quality and the ability to expand your system with a wide array of attachment to meet your training needs. "We believe that no one should have to compromise when training at home."

NEW IN 2018

For 2018, we further improved the Workbench-Power Rack with improved J-hook design, and added the multi-grip pull up bar to the standard package. Users also have the option to add the front safety catch bar. We will be offering a newly designed off-center Polyurethane coated steel dumbbell set and a premium Polyurethane coated steel bumper weight plates set.

Also new in 2018, we will be introducing the Powertec® Streamline series, starting with the Streamline Power Rack, Streamline Half Rack, Streamline Functional Trainer, Streamline Olympic Bench and the Streamline Utility Bench. This series was designed as an all essential, no frills added line under the Powertec® brand.

POWERTEC®
LEVERAGE

WB-MS

WORKBENCH® Multisystem

The Powertec® Workbench Multisystem is the market leader in multi-station leverage gyms. The revolutionary design provides complete body training for up to three users simultaneously, while maintaining a relatively compact footprint. The system can be accessorized with a wide variety of accessories to grow with your training needs. Ideal for home, personal trainer and light commercial use.

WB-LS

WORKBENCH® LEVERGYM®

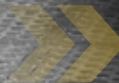

The Powertec® Workbench LeverGym™ is one of the most functional single station home lever gym systems ever created. The heavy duty isolateral lever arms can safely hold up to 500 lbs., while the workbench can be detached for power lifting access. The list of exercises is almost endless, especially with the wide variety of accessories that can be attached to the workbench.

WB-MP

WORKBENCH® MULTIPRESS

“ALL OF THE BENCH-PRESSING EXERCISES WITH TOTAL SAFETY AND CONTROL”
With dual isolateral leverage arms, the Multipress is designed with control and safety in mind. The MP allows the user to experience the same feel and range of motion of a free-weight system while maximizing their capacity, all with the safety of a machine. The fully adjustable bench provides for a wide range of upper body workouts.

L-CDA

LEVERGYM® CHIN / DIP ASSIST PLUS

This machine provides assisted resistance to allow the user to perform dips or chin ups. The loaded weights act to counterbalance bodyweight. This enables the user to perform the exercise with perfect form, while working up to full bodyweight in resistance.

L-SC

LEVERGYM® SQUAT / CALF

The Levergym Squat/Calf machine is designed to maximize your leg training. With the safety of our Lever Arm and a foot-plate with the optimal angle, all of the stress and pressure is taken off the lower back and knees. The resistance is focused on the thighs, glutes and calves. Take your leg training to the next level.

Note: Capacities are fully tested to a reasonable load rate.

WB-HR

WORKBENCH® HALF RACK

Designed following the same specification for our leading Power Rack, the Workbench Half Rack is the perfect solution for the serious trainer with limited space. The new WB-HR will come with newly designed J-hook and an increase in height. The user has the option to expand in the future, using our Lat Tower attachment (WB-LTO) or the unique Workbench Utility bench (WB-UB) for additional exercises.

P-LP

LEG PRESS

Safe, compact and high weight capacity are but a few features of the Powertec® Leg Press. Being one of the most compact x degree leg press machines on the market, this machine offers 1000 lbs. capacity. This leg press also comes with dual safety catches on each side, a large foot plate and an adjustable back rest for different leg press positions. The P-LP is a must have for every home gym.

P-CLS

COMPACT LEG SLED

“The most compact leg press in half the space!”
The Powertec® Compact Leg Sled is one of the most smooth and compact leg press machines on the market. The sled glides on a specially designed carriage driven by ultra-low resistance nylon wheels with sealed bearings. While the footprint is quite compact, the leg sled still allows for full calf raise for most users.

P-HC

DUAL HYPEREXTENSION / CRUNCH

“Strengthen your CORE, lower back, glutes and abs in a comfortable and precise position”

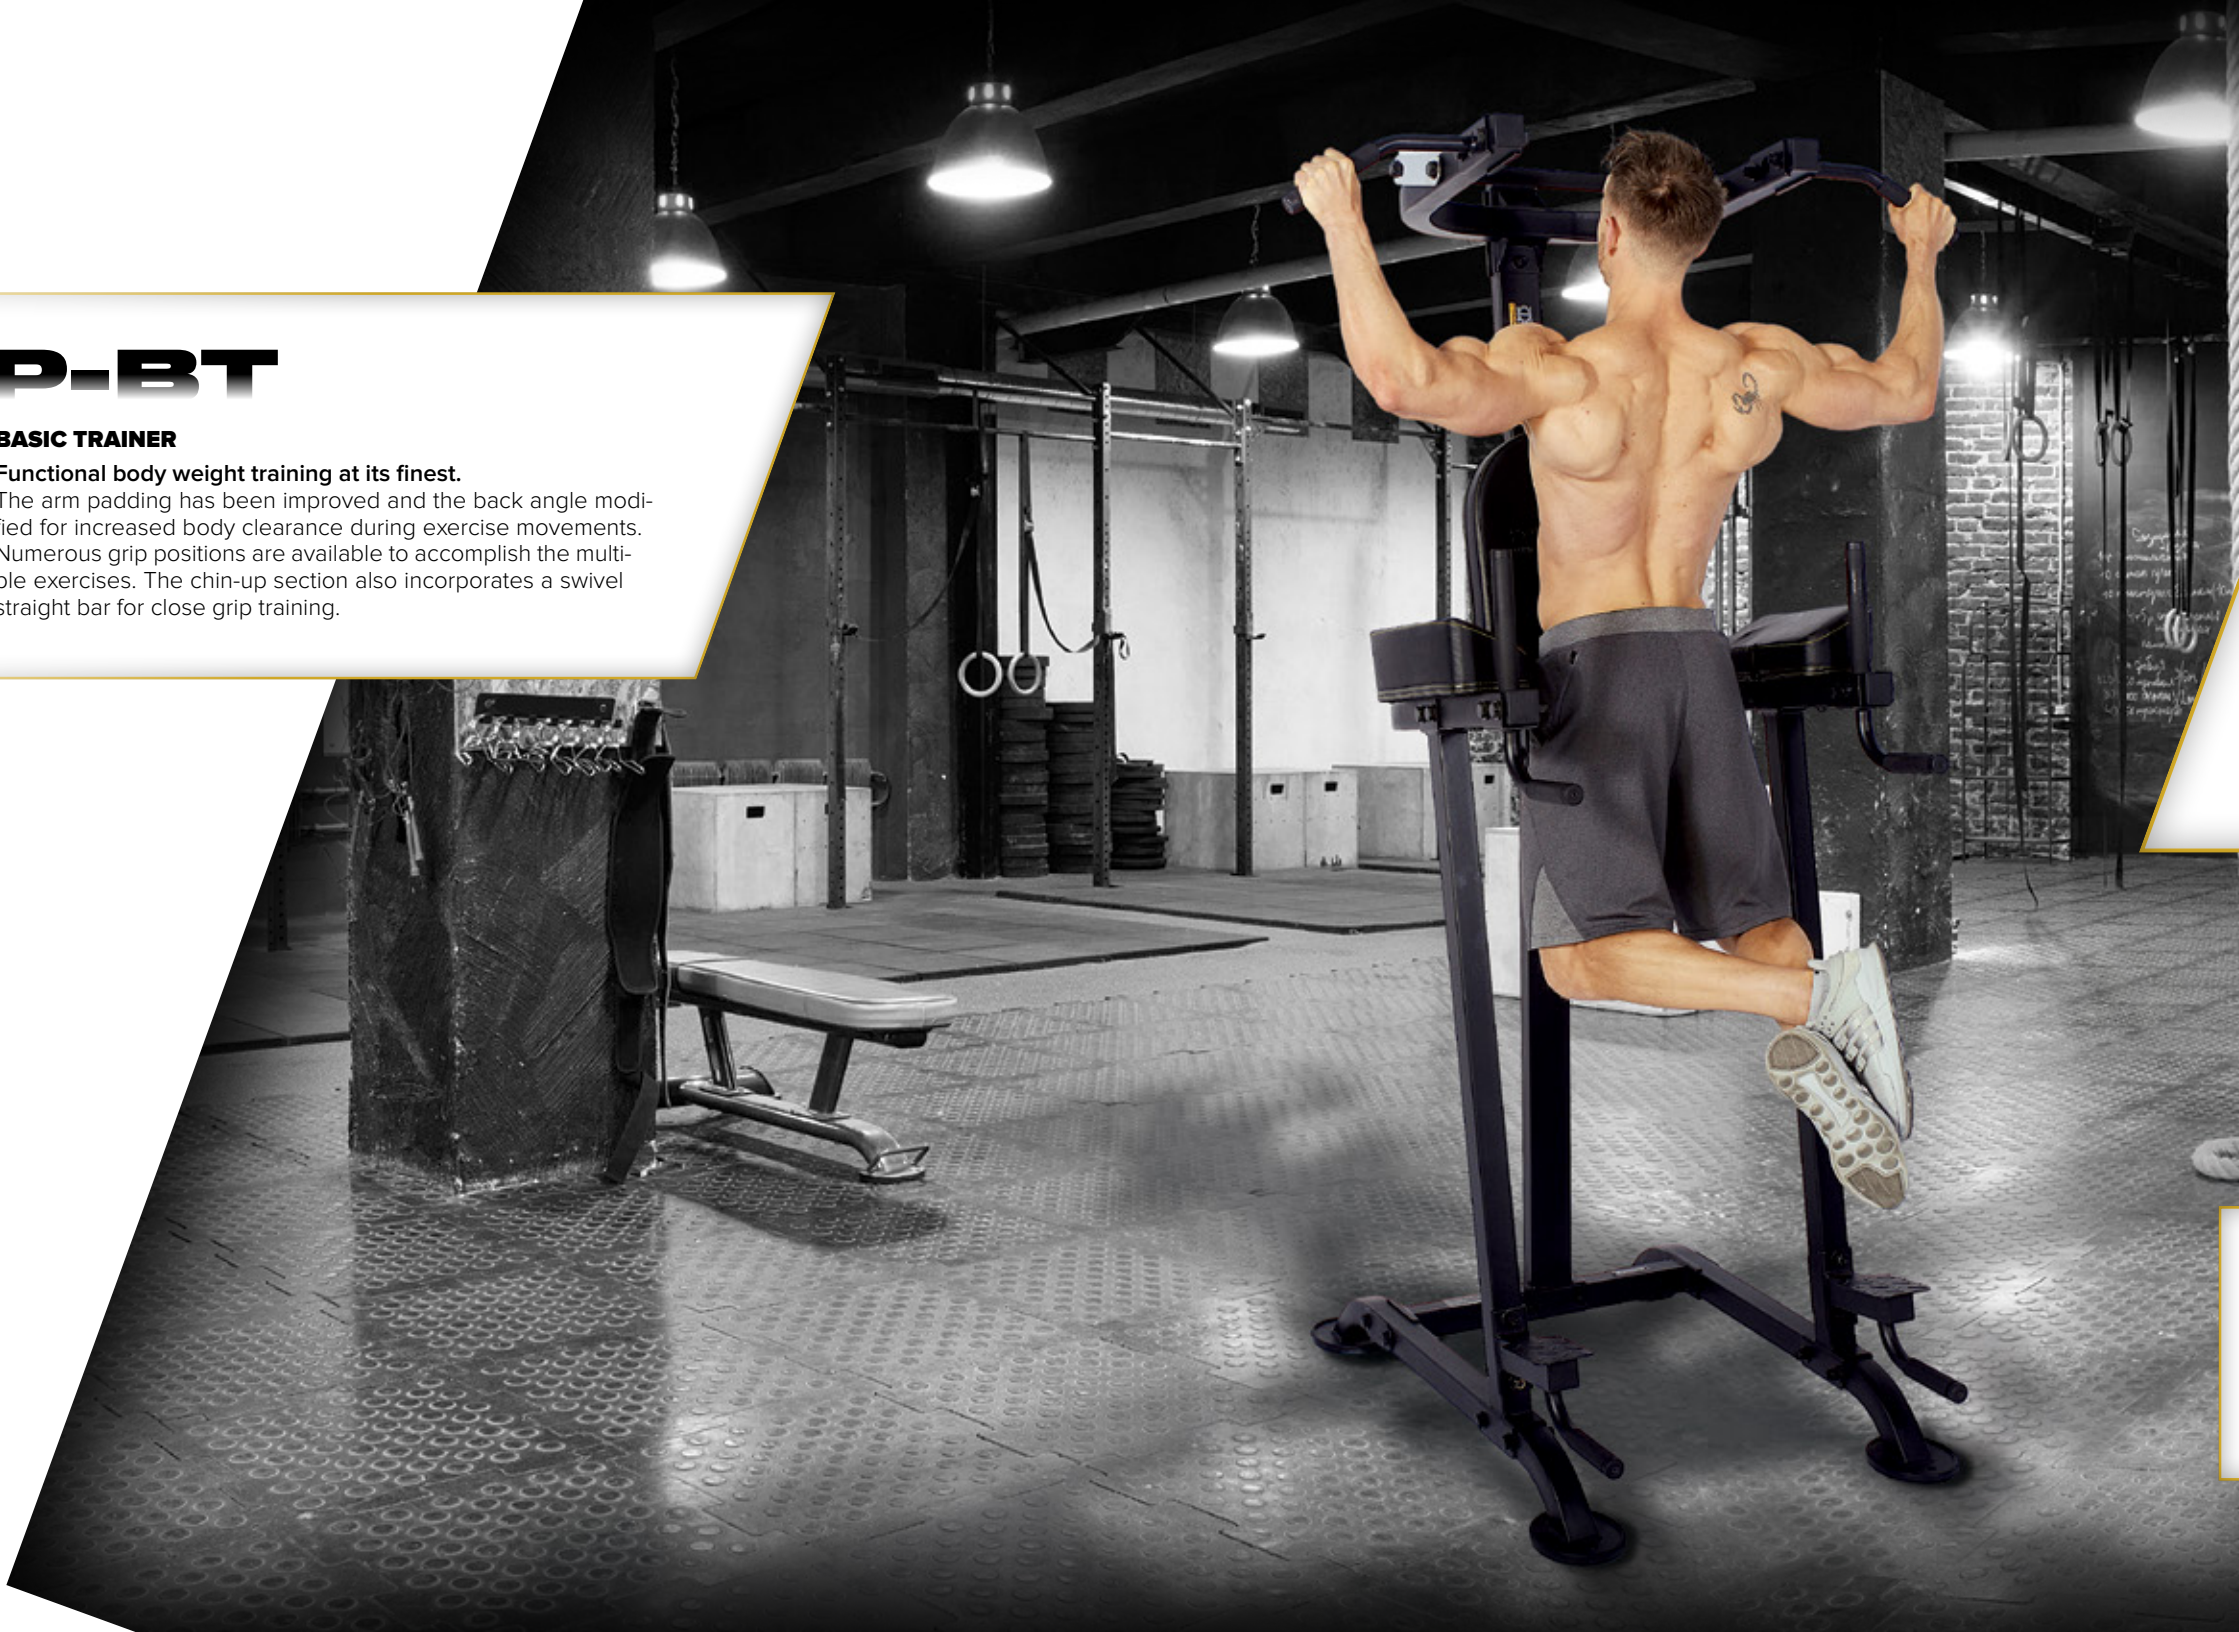

This is the only bench of its kind that provides access to performing the hyperextension at a fixed 45-degree angle or at the traditional horizontal position. Numerous adjustments on the foot plate, rollers and seat allow the user a custom fit to perform multiple movements for all body types.

P-BT

BASIC TRAINER

Functional body weight training at its finest.
The arm padding has been improved and the back angle modified for increased body clearance during exercise movements. Numerous grip positions are available to accomplish the multiple exercises. The chin-up section also incorporates a swivel straight bar for close grip training.

WB-FTD

WORKBENCH® FUNCTIONAL TRAINER DELUXE

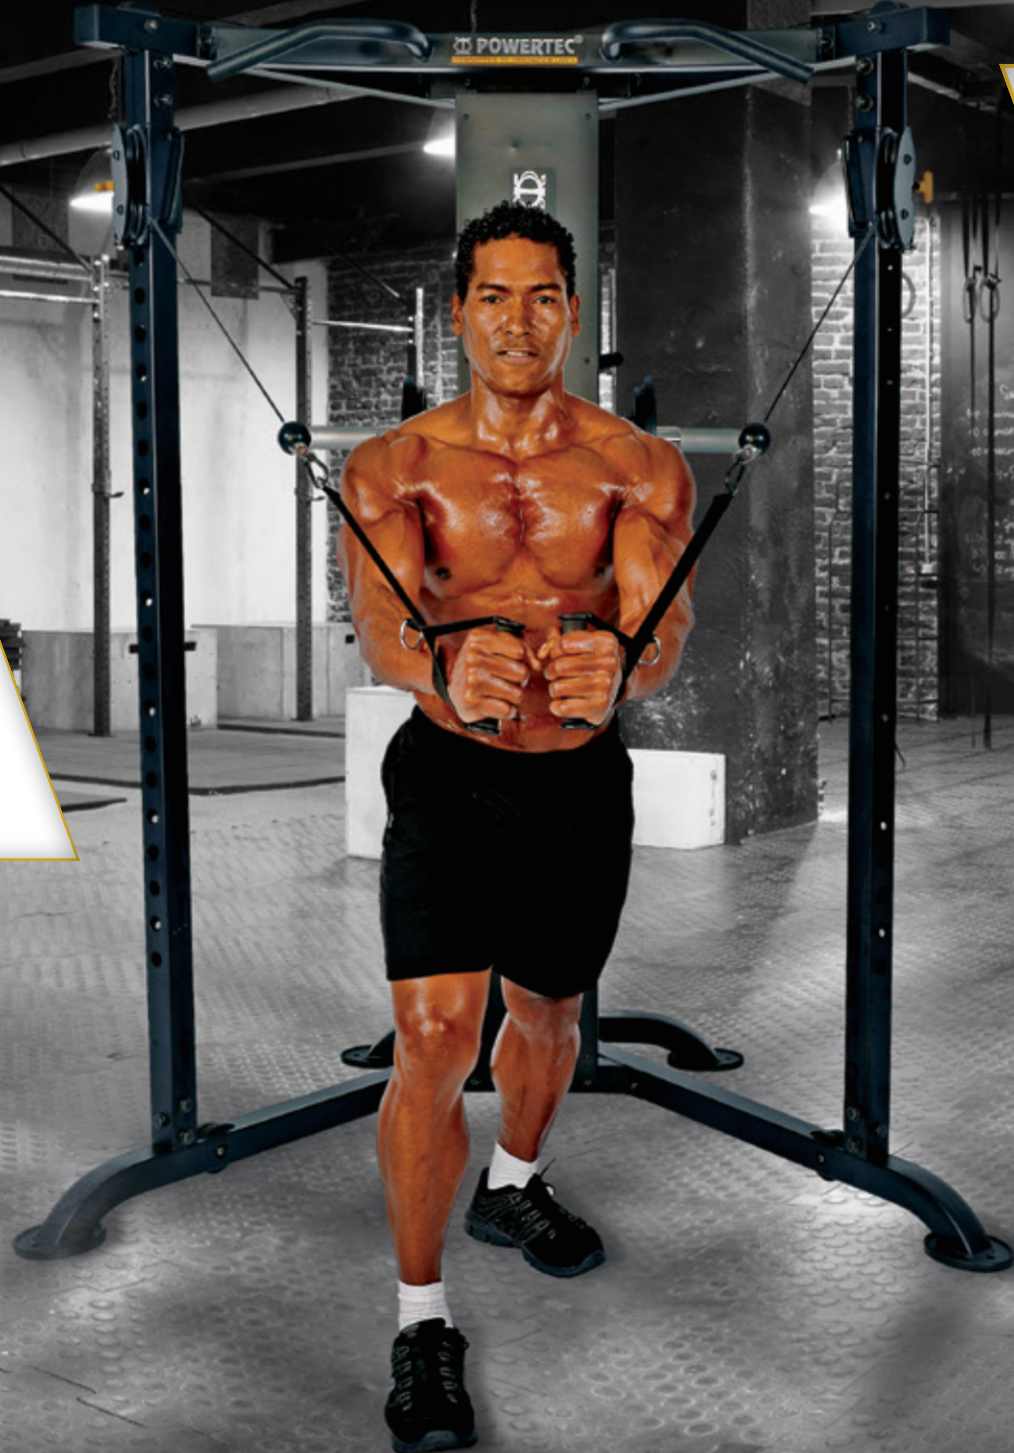

The Functional Trainer Deluxe is one of the most versatile and unique training systems on the market, with a total resistance capacity of 1000 lbs. The FTD comes standard with two, free-weight loaded, weight stacks. For even greater weight capacity, the user can choose to add two optional 190lb weight stacks that bring each stack to a 500lb capacity, That's 1000 lbs! No other Functional trainer on the market can deliver that. This machine is ideal for the bodybuilder looking to isolate and maximize each muscle group or those looking for a total body workout in one machine.

WB-FTS

STREAMLINE FUNCTIONAL TRAINER

The Streamline Functional Trainer is one of the most versatile and unique training systems on the market. The FTS comes standard as a free weight plate loaded machine. Add the optional 190lb single selectorized weight stack and you'll have an industry leading 500lb weight capacity. This machine is ideal for bodybuilder looking to isolate and maximize each muscle group or those looking for a total body workout in one machine.
